Assignment 4 (README)
Information Retrieval

Submitted by: Himanshu aggarwal
                        MT17015

The assignment folder consists of 3 python files and one folder.

Generator.py
Generates the vectors for all the documents and also computes centroids. Saves this data in the 'data' folder for further use.

testingRochio.py
Tests the rocio model and gives accuracy.

testKnn.py
Tests the KNN model and gives accuracy.

data
Contains data generated by Generator.py. It is used by other python files.
